POLYETHYLENE SIGNS

Polyethylene is one of the most common types of plastic in the world today. It is lightweight, strong, impact resistant, recyclable, can withstand a wide temperature range, and has some chemical resistance attributes. This durable material resists cracking, peeling and chipping, even in cold weather climates making it a perfect choice for signs used both inside and outdoors. Choose from simple spot color or 4-color process printed signs available in several standard sizes and shapes and unique custom products in a variety of thicknesses.

Material: .055" White Polyethylene

No die charges!

Popular Uses: Warning and safety messages, branding information, and machinery instructions
